

ZIED SAYADI

Full-Stack DEVELOPER

PROFILE

Kanban certified full stack developer, and computer enthusiast. I learned how to code from GoMyCode bootcamp in various computer languages (Javascript, PHP, ReactJs...) and created many personal projects (social apps, restaurant apps, booking apps ...). Versatile, I master the different technical stages of creating a website or a web application ; from understanding user needs, to frontend and backend development.

Languages

ARABIC : Maternal

FRENCH : Good

ENGLISH : Fluent

EXPERIENCE

Internship at EDONEC Company

Contexte :

During 3 months, I have worked on 2 main projects, the first of which was a Bookings site, and the other a photo sharing service application.

My Tasks :

- Creating and designing accessible, responsive and functional UI.
- Fixing bugs, and testing code, using unit testing tools.
- Fetching and using data from server, using react management tools.

What i learned :

During this period I learned how to work with react hook forms for the control and validation of forms, Typescript to have more reliable code and easier to remodel, thus minimizing the errors, and also how to use the different types of hook for the management of data and code optimization such as (useEffect, useState, useMemo, useCallback ...)

Technologies :

Reactjs / Redux / HTML 5 / SASS / Jest / JavaScript / TypeScript / MongoDB / NodeJs / ExpressJs / RestApi / SOAP_API / Gitlab / React-hook-form / Bootstrap

Methodology :

Agil_KANBAN

PERSONAL PROJECTS

Project based on symfony stack :

A full-Stack web site, using symfony 5 in backend, twig to create UI, and MySQL for the database.

Its a painting blog web site for an artist, in which user can have access to latest paint and blogs, and can see the portfolio of the artist, and the details of each blog post and price of art. also the user can have access to more features when he sign in, such as commenting the blogs and paints.

The artist can delete or edit any existing post or comment, also he can publish a new post.

Technologies :

PHP 8 / Symfony 5 / PHPUnit / SASS / HTML 5 / Docker-compose / JavaScript / MySQL / Twig / Bootstrap / RestApi / Gitlab / UML / MVC / Trello

Methodology :

Agil Kanban methodology, using MoSCoW prioritization technique for managing requirements.

January-2022

February-2022

Projects based on MERN stack :

Through the several last months I created different web sites and applications using MERN stack from e-commerce web sites, social app with chat-system to a Bookings site, and media sharing service application.

In all of those projects, I used Bootstrap and/or Material UI for the design, Hooks for all functionalities and Redux as state managing tool in the front-end section. I used NodeJs and express to manage all routes, and MongoDB as a database to store all the data.

Technologies :

Reactjs / Redux / HTML 5 / SASS / Jest / JavaScript / TypeScript / MongoDB / NodeJs / ExpressJs / RestApi / SOAP_API / Gitlab / React-hook-form / Pusher / Firebase / Material UI / UML / Github / Bootstrap
